

AIDIL BAIHAQI

Full Stack AI Engineer | Interested in Bioinformatics & Medical AI

Passionate and results-driven programmer with strong experience in software engineering, specializing in backend development, data-driven systems, and AI-based applications. Experienced in building scalable web systems, collaborating in multidisciplinary teams, and delivering high-quality projects for academic, community, and organizational needs. Proficient in modern development tools and agile workflows to solve complex problems efficiently.

WORK EXPERIENCE

Backend Engineer - Contract Employee

UmbiTeams | Batam, Kepulauan Riau, October 2025 - Present

- Designed and developed backend systems including APIs, database architecture, and server-side logic to support client projects across web and mobile platforms.
- Developed ML-based intelligent features for data processing, prediction, and automation integrated into production-grade applications.
- Collaborated with frontend developers and UI/UX designers to deliver cohesive, user-centric digital products for diverse client needs.
- Managed end-to-end project delivery from requirements analysis to deployment, ensuring system scalability, performance, and maintainability.

Bioinformatics Mentor - Contract / Competition Program

SMAN 1 Tanjungpinang | Tanjungpinang, Kepulauan Riau, July 2025 - November 2025

- Mentored the informatics team for the National Bioinformatics and Synthetic Biology Competition, focusing on 3D web visualization for genomics, sequence analysis, and ML-based data interpretation.
- Guided students in developing an interactive 3D website to present genomic and analytical insights using modern web technologies.
- Designed an IoT-based prototype for a smart sprayer and early detection system for *Ralstonia solanacearum*, integrating sensor data flow and conceptual ML-driven alerts.
- Provided technical direction and structured learning materials to strengthen students' understanding of bioinformatics application in digital and IoT-driven solutions.

Data Analyst, AI & Automation - Internship

Badan Pusat Statistik (BPS) Provinsi Kepulauan Riau | Tanjungpinang, Kepulauan Riau, June 2025 - March 2026

- Analyzed large-scale statistical datasets using SQL and Python to identify trends and patterns supporting national data reporting and government initiatives.
- Built scalable backend data pipelines integrating multiple government data sources to power operational dashboards and analytics.
- Collaborated with cross-functional government teams to deliver actionable insights aligned with national statistical programs and policy needs.

Full Stack Developer - Contract Employee

PT Arus Digital Sinergi | Tanjungpinang, Kepulauan Riau, October 2024 - November 2025

- Developed and delivered full-stack solutions including company profile websites, ERP systems, MVPs, and enterprise-scale applications for diverse clients.
- Built scalable and user-centric web and mobile applications using modern technologies including Go, Node.js, React, and Laravel frameworks.
- Collaborated closely with cross-functional teams to translate business requirements into effective technical solutions aligned with client expectations.
- Ensured code quality, performance, and maintainability through structured development workflows and best practices across all project phases.

Informatics Club Mentor - Contract Employee

SMA Negeri 1 Bintan Timur | Bintan, Kepulauan Riau, August 2024 - November 2024

Mentored students on programming fundamentals, Python, basic AI, computer vision, and competitive IT problem-solving skills to prepare them for national competitions.

SKILL

Full Stack	Next.js, Tailwind CSS, Javascript, Typescript, PHP, Golang, Node.js, Laravel, Flask, Express.js, PostgreSQL, MySQL, SQLite, Git, Github
DevOps	Docker, Kubernetes, Nginx, Linux Server, Github Action
Data & AI	Python, Tensorflow, Scikit-learn, Pandas, Matplotlib, HuggingFace, Kaggle, Google Colab, Tableau, Google Spreadsheet, Google Colaboratory, PyTorch, Keras, Deep Learning
Soft Skill	Coaching & Mentoring, Public Speaking, Critical Thinking, Problem Solving, Research

EDUCATION

Universitas Maritim Raja Ali Haji, XC5V+627, Senggarang, Tanjung Pinang City, Riau Islands 29115, 2023 - Present
Bachelor in Informatic Engineering | GPA: 3.78 / 4.00
Focused on web systems and applied artificial intelligence.

- **OBE Curriculum Information System – Web Developer** (2024) Selected among four candidates to develop the Outcome-Based Education (OBE) learning system platform. Designed and implemented core web architecture that supports academic evaluation and digital transformation for over 1,000 students and faculty members.
- **Research in Bioinformatics & Machine Learning** (2025 – 2026) Conducting applied research as a Machine Learning Engineer in bioinformatics, emphasizing :
 - Control of *Ralstonia solanacearum* using gene editing and IoT-based detection via compound induction (3-OH-MAME).

ORGANIZATION

Tim WAT - Technology & Innovation Group - Project Manager & Full Stack Developer
Tanjungpinang, Kepulauan Riau, August 2025 – March 2026
Team WAT is a multidisciplinary student innovation team specializing in web-based systems, AI integration, and digital cultural preservation projects. As a founding member and project lead, I have managed cross-functional collaboration between developers, designers, and researchers to deliver competitive technology solutions.

CERTIFICATION

- Certified Developer, Alibaba Cloud, Number: ACCD0173710100006451
- Webinar Speaker - Sharing is Caring "Talent Needs in the Digital Era", Politeknik Negeri Jakarta x Train4best x Lu kan Anak IT
- Programming Webinar Speaker - "Beginner Programming Taste: Fast Build App with Laravel Vibe Coding", Batam Linux User Group
- Web Development Bootcamp, Infinite Learning, Batam
- Event Baparekraf Developer Day Yogyakarta, Ministry of Tourism and Creative Economy of the Republic of Indonesia

AWARDS

- Gold Medal – International Beyond Borders: A Story of Innovation and Care UMRAH × UKM 2026
- Gold Medal – National Bioinformatics and Synthetic Biology Competition, Institute Technology of Bandung 2025
- Finalist - AL Ahmadi International Entrepreneurship Competition, Batam, 2025
- 1st Place – Entrepreneurship Competition, Universitas Maritim Raja Ali Haji, 2025
- Semi Finalist – National AI BMC Competition, College Pilot & and Competition Realms, 2025
- Finalist – ID Fest Developer Day, Jakarta, Kementerian Komunikasi and Digital Republik Indonesia, 2025
- 1st Place - Festival Open Source Software, Batam, Batam Linux User Group, Politeknik Negeri Batam, 2025
- 2nd Place – Festival Open Source Software, Batam, Batam Linux User Group, Politeknik Negeri Batam, 2024
- 1 of 1100 programmers invited to the Baparekraf Developer Day, Yogyakarta, Kementerian Pariwisata dan Ekonomi Kreatif, 2024
